

Mini Report

Coverage changes

- Added additional customers and purchases to test branches related to loyalty/discount potential.
- Added additional orders to cover tax applicability and fragile/heavy items.

Main.py changes

- Changed the thresholds in `generate_report` into variables so they are easier to modify.
- Renamed variables in `generate_report` to be more readable.
- Merged the calculation for heavy and fragile items.
- Removed redundant variables and functions at module level.
